

AVAILABLE

**Simple Inexpensive Test
To
Predict Methane Production
Of A Waste**

Contact Environomics for additional information

World-renowned methane production experts in a World-class university laboratory perform tests. A final 8-15 page document will arrive in most cases 60 days from the date of sample shipping and will include all findings including the quantity of methane which is possible to be produced from the waste tested. Report will state expected methane and Btu value of gas which would be produced.

Print this form, complete the information and fax (845.635.4169) or email (rpm@waste2profits.com)

**Yes, Tell me more about testing to determine the
amount of methane my waste will produce**
